ENHANCE YOUR INSURANCE COVERAGE

January 2021

It always seems like you find the gaps in your insurance coverage at a time of loss. Mutual Aid Agency wants to keep you informed of endorsements that can be added to a standard insurance policy to make sure there are no surprises when it comes time to submit a claim. Both coverages listed below are not included on a standard homeowner policy, but we encourage you to consider adding them as simple, inexpensive ways to upgrade your coverage.

WATER BACKUP AND SUMP DISCHARGE OR OVERFLOW COVERAGE:

Imagine walking into your basement to find water has backed up from a sewer or drain within your home. Do you have coverage? Chances are you will need it, especially if your sump pump fails. With the water backup and sump discharge or overflow endorsement, you would have coverage to help pay for damage caused by the resulting water backup when this happens. This does not include coverage for flood or surface water backup. Some exclusions may apply.

UNDERGROUND SERVICE LINE COVERAGE:

Many homeowners do not realize that the repair or replacement of underground service lines on their property may be their responsibility. Did you? This coverage helps protect homeowners against costly excavation and the repair of underground utility wiring and piping. This does not include coverage for blockage or low pressure when there is not physical damage to the covered service line. Some exclusions may apply.
